(a) Study 2 and 3 design

Consider Alice and Barbara, who work in the same field.

Study 2: Alice and Barbara are in a relationship where Alice has (*equal* / *less* / *more*) power, status, or influence.
Study 3: (*Alice and Barbara are peers who have the same roles* / *Barbara is Alice's advisor or mentor* / *Alice is Barbara's advisor or mentor*)

This week, when they met for coffee, **Alice** bought and brought coffee to the meeting for both of them. How likely is it that...

Reciprocity:	Precedent:	No interaction:
The next time they meet for coffee, they expect that **Barbara** will buy and bring coffee to the meeting for both of them.	The next time they meet for coffee, they expect that **Alice** will buy and bring coffee to the meeting for both of them.	Alice and Barbara do not expect to meet for coffee in the future.
Extremely unlikely (1) - Extremely likely (7)	Extremely unlikely (1) - Extremely likely (7)	Extremely unlikely (1) - Extremely likely (7)
